EXPERIENCE

IDF, Lotem— *Full stack developer*

MARCH 2016 - JUNE 2020

Served as a software developer in a top-secret unit in the IDF.

- Develop for a real-time web project built on .NET Web API and C# backend, AngularJs and JavaScript frontend, and MongoDB. Work on both frontend and backend equally to create new features.
- Follow best practices in an agile software development environment.
- Integrate and sync data between a MongoDB based web application and an older SQL based application. While rewriting the old application we had to maintain and keep both versions active, therefore I developed under the need for consistency of data in both applications, paying close attention to data updating according to constraints of each application.
- Refactor the notifications infrastructure in order to improve performance.
- Mentoring new trainees on the unit's web training, and .Net training.

B.Sc in Computer Science - Final Project

Develop a javascript based web application, "AllRight", as an online platform for the acquiring of copyrighted content licenses.

The app was built using React, Node, and MongoDB.

On GitHub: [AllRight](#).

EDUCATION

B.Sc in Computer Science

The College of Management

Academic Studies

2017 - 2020

IDF Programming Course

BASMACH IDF School for
Computer Professions

SEPTEMBER 2015 - MARCH 2016

High School Diploma

Atid High School For Science

2010 - 2014

SKILLS

Javascript, C#.NET, HTML,

React, Node.js,

MongoDB, SQL Server,

Git, Webpack
